

## 2024 Summer Intern, Junior Energy Research & Investments Analyst - Private Equity

Based in Calgary, Canada, [ARC Financial Corp.](#) is Canada's largest energy-focused private equity manager. Since launching the first ARC Energy Fund in 1997, ARC has invested over \$6 billion in over 180 companies. We are currently invested in ~20 portfolio companies across six active funds. ARC invests in various energy companies, from traditional oil and gas to energy transition.

As a private equity firm, our primary role is to make investments on behalf of our investors, who include an experienced and committed group of institutional investors. Our team of highly experienced investment professionals is responsible for sourcing and identifying opportunities, structuring and negotiating deals, monitoring investments, and exiting at the opportune time. Working in a team-based environment with our investment professionals, you will have the opportunity to develop the skills required to be successful in a career in capital markets or the energy sector. Our team's diverse technical and financial background and our wide range of daily activities will ensure that you are exposed to all aspects of our business.

The energy research group for ARC Financial is branded as the [ARC Energy Research Institute](#). The Institute conducts economic and investment analysis for ARC Financial Corp. and its stakeholders. The Institute is an integral part of ARC Financial Corp.

The ARC Energy Research Institute is dedicated to researching complex, interrelated trends influencing the energy business, including financial, political, environmental, technological, social, and economic forces. These forces will shape the future of the world's energy supply and consumption.

This summer, ARC Financial Corp. and the ARC Energy Research Institute will share the student role. The successful candidate will gain exposure to both the energy transition and traditional oil & gas sectors through their work. Some of the roles and responsibilities over the contract term may include:

### Research Focus:

- Conducting energy systems and market research, including supply, demand, policy, economics, and greenhouse gas emissions.
- Preparing, presenting, and writing internal reports on research results
- Attending internal energy research meetings
- Providing support to the research team as required

### Investment Focus:

- Managing financial models and databases
- Preparing and presenting internal reports
- Assisting with evaluation of new investment opportunities
- Attending internal portfolio operations meetings
- Providing support to the investment team

### Skills and Education:

- Enrollment in a relevant undergraduate program, with a preference for engineering or business/commerce students (graduating in 2024 or 2025)
- Exceptional knowledge of Microsoft Office applications, especially Excel and AI tools
- Superior quantitative, analytical, communication, and presentation skills
- Initiative, creativity, and independent thinking with a strong attention to detail
- Strong work ethic
- Excellent interpersonal skills and a desire to be a team player

Term:

- May/July to August/September 2024

This is an entry level position. Some employment experience in the energy or investment industry is an asset but not required. Interested candidates should e-mail a cover letter, one-page resume and all university transcripts to:
